## SUMMARY

---

Software test engineer (quality assurance specialist) with three years of experience in test strategy design, test automation, test plan, test execution(manual and automated), and test framework/tool development in the highly regulated industry in a SCRUM/Agile environment. Experienced in complex test management and tractability. Have deep understanding of functional testing with behavior-driven development and test-driven development. Have strong technical acumen with extensive defect and bug identification, triage, reporting, and verification exposure. Oversaw verification and validation regularly for web applications, API services, etc.

## EDUCATION & CERTIFICATIONS

---

**Rose-Hulman Institute of Technology** **Terre Haute, IN**  
*Bachelor of Science, Computer Science and Software Engineering (2018) GPA: 3.73/4.00*  
**Scrum.org | Professional Scrum Product Owner I (2019) & Professional Scrum Master I (2018)**  
**Triplebyte | Generalist Software Engineering (2019)**  
**California State Department of Consumer Affairs | Engineer in Training (2020)**

## TECHNICAL SKILLS

---

Selenium	HTML/CSS/Javascript/TypeScript	Cypress	Behave
Java	Python	AWS	Git
MySQL	Mac/Linux/Windows OS	Jenkins	Docker

## EXPERIENCE

---

<b>Jun 2020 - Present</b>	<b>Benchling</b>	<b>San Francisco, CA</b>
<i>Software Engineer, Quality</i>		
<ul style="list-style-type: none"><li>• Participating in multiple company-wide quality-related projects for a cloud company that develops software platform powering breakthrough research on biotherapeutics, biofuels, and biomaterials</li><li>• Acting release engineer to perform release activities for GxP(regulations and guidelines applicable to life sciences organizations) customers. Responsibilities include developing release/upgrade plans, finalizing code for release, generating release patches, and performing testing and production environment deployments</li><li>• Consulting and reviewing testing code development</li><li>• Designing and implementing test case management SOP(standard operating procedure) that meets the current corporate and federal regulations</li><li>• Participating in GxP SOP design and technical implementation/automation</li><li>• Researched and evaluated the difference between Cypress and TestCafe. Heavily influenced the company's tech stack choice</li><li>• Participated in web application testing framework development using Cypress</li><li>• Designed and implemented a test traceability system with Jira/Xray integration to enable the product to be GxP compliant</li><li>• Supported/developed developer productivity tools</li></ul>		

**Jul 2018 - Apr 2020**

**HeartFlow, Inc**

**Redwood City, CA**

*Software Engineer in Test*

- Oversaw quality and testing for platforms' and services' components in a SCRUM/Agile environment for a medical technology company that develops software used to create 3D models of coronary arteries to analyze blockages and the impact on blood flow
- Supported development and verification of three web applications, three backend/API services and four workflow/product-related components
- Maintained and refactored existing legacy test frameworks to improve stability and speed, continuously deliver new features for newer frameworks
- Implemented and maintained internal tools to support the development and verification effort
- Designed manual and automated tests using Python and JavaScript to refine and verify product requirements prior to launch/implementation
- Discovered and managed hundreds of internal and external defects and bugs
- Conducted verification/validation activities, including developing and executing test plans, reviewing results and writing reports, and collaborate with cross-functional teams to perform functional, regression, and system-level testing, and ensuring all test-related documentation meets the current corporate and federal regulations
- Prepared Test /Risk Traceability Reports to document test execution outcomes and traced each product requirement and risk contributor/mitigator to the test

**Additional Experience**

- Teaching Assistant (Mar 2017 - May 2018) - Rose-Hulman Institute of Technology
- Software Engineer in Test, Intern (May 2017 - Aug 2017) - HeartFlow, Inc
- Software Intern (Feb 2017 - May 2017) - Rose-Hulman Ventures
- Software Intern (Jun 2016 - Jul 2016) - Pansoft Co. Ltd.
